WORK EXPERIENCE

Mobile_App_Developer(Intern)

HiSkyTech | Sargodha, Pakistan

- Developed **3+ mobile applications** using Kotlin and React Native for Android and iOS platforms.
- Designed and implemented **15+ responsive mobile screens** following modern UI/UX principles.
- Integrated **Firestore Authentication, Firestore, Realtime Database** in **3+ projects**.
- Improved app performance by **15-20%** through code optimization, efficient state management, and lazy loading techniques.
- Resolved **15+ bugs and UI issues**, improving application stability and user experience.
- Participated in the complete development lifecycle of **3+ mobile apps**, from design to deployment.

EDUCATION

University of Sargodha

BS Information Technology – CGPA: 3.78/4

2024-28 (In Progress)

FSC (Pre-Med)

Marks: 906/1100

2021-23

Matric (Science)

Marks: 1056/1100

2019-21

PROJECTS

DineTime App (React Native + Firebase) 📄

- Built a **cross-platform mobile app** for booking restaurant tables in real-time.
- Integrated **Firestore Realtime Database** to update table availability dynamically.
- Added **Firestore Authentication**.
- Used **React Navigation** and **Redux Toolkit** for smooth UI and state management.

QR Code Scanner (Android – Kotlin) 📄

- Developed a **native Android application using Kotlin** to scan and decode QR codes in real time.
- Implemented **camera-based scanning functionality** to detect and process QR codes efficiently.
- Enabled automatic recognition of QR content such as **URLs, text, and contact data**, improving usability.
- Designed a simple and intuitive **user interface for seamless scanning experience**.
- Optimized performance for **fast detection and minimal latency** during scanning operations.
- Applied core Android concepts including **camera handling, permissions, and activity lifecycle management**.

FlashPro (Android – Kotlin / Utility App) 📄

- Developed a **native Android application using Kotlin** focused on flash/utility functionality with a clean and responsive UI.
- Designed and implemented core features for **real-time device interaction and system-based functionality**.
- Built a lightweight and optimized architecture ensuring **fast performance and minimal resource usage**.
- Applied **Android best practices including activity lifecycle management and permission handling**.

- Improved user experience with a simple and intuitive interface for quick access to features.
- Focused on **modular and maintainable code structure** for future scalability and enhancements.

Licenses & Certifications

React Native (Meta) 

Mobile Android Development (HiSkyTech) 

SKILLS

Languages: C++, JavaScript, Kotlin, Basic Python

Frameworks & Libraries: React, React Native, Redux ToolKit, Zustand

Database: Firebase, SQL (MY SQL) and SQLITE

Backend & Services: Firebase (Auth, Firestore, Realtime DB), Node.js

Tools: VSCode, Android Studio, Git & GitHub, Stitch Ai
